Level one was very simplistic but was ok. But I see from reading the community hub that there is a bug that prevents level two "Travel" from launching, and so that's it. End of game. It's been two months without an update to fix the bug.. The game is what you would expect from a Mahjong game. I do not recommend it because there are no options in game (nothing like sound,

screen options.) and it seems to not be 100% working, as the Travel game mode got stuck in the screen of the first mahjong table, forcing me to alt+F4 quit it.
